Simmpl configuratie-handleiding voor de FRITZ!Box

In deze handleiding kunt u lezen hoe u uw FRITZ!Box instelt voor een VoIP-account van de Simmpl telefooncentrale.

1. Maak een Simmpl toestelaccount aan

Voordat u de telefoon kunt instellen maakt u op de Simmpl centrale aan:

- een gebruiker (Extension)
- een toestel (Device) → hier vindt u ook de SIP-username en password
 Voor meer informatie, raadpleeg de Simmpl handleidingenbibliotheek.

2. Sluit de FRITZBox aan

De FRITZ!Box is een modem-router, dus het aansluiten ervan kan iets meer werk zijn dan enkel de stekker in het stopcontact doen. Zie hiervoor onze aparte handleiding. U bent klaar om uw FRITZ!Box voor Simmpl in te stellen als de FRITZ!Box met internet is verbonden.

3. BELANGRIJK: voorzie uw FRITZ!Box van de laatste firmware

Het is van groot belang dat u uw FRITZ!Box van de **laatste firmware** voorziet. Omdat de FRITZ! zoveel functies vervult in uw netwerk, is een niet goed beveiligde FRITZ!Box een belangrijke kwetsbaarheid voor uw netwerk. Mocht zich een probleem hiermee voordoen, dan is het mogelijk dat uw VoIP-accounts door kwaadwillenden worden gebruikt en dat u de rekening betaalt...

ING BANK 5041280 IBAN NL66INGB0005041280 BIC INGBNL2A KVK 02066541 BTW NL1041.63.252.B01

4. Sluit uw apparatuur op de FRITZ!Box aan

Er zijn diverse modellen FRITZ!Box die elk andere telefoon-aansluitingen bieden.

- Analoge aansluitpoorten: hierop kunt u analoge toestellen aansluiten
- S0 ISDN-poort: hierop kunt u uw ISDN-telefooncentrale aansluiten
- Ingebouwd DECT-basisstation: hierop kunt u uw draadloze handsets aanmelden

Als u uw telefoontoestellen / -ISDN-centrale aansluit, dan kunt u in de FRITZ!Box per nummer instellen welke toestellen gaan rinkelen als u dit nummer gebeld wordt en met welk nummer de toestellen uitbellen.

4. Log in op uw FRITZ!Box

De FRITZ!Box heeft als standaard IP-adres: <u>http://192.168.178.1</u> (aanpasbaar). Af-fabriek is er GEEN wachtwoord ingesteld. U kunt dus gemakkelijk inloggen en alsnog een wachtwoord instellen als u dat wenst.

Inloggen:

Log in op uw FRITZ!Box. Uw Overview verschijnt met daarin een overzicht van de services die de FRITZ! u biedt:

| 💭 Home Network | | | | | | | |

Om uw Simmpl VoIP-account toe te voegen, klik op [New Telephone Number].

Doorloop de wizard en maak de volgende keuzes:

Vul in het volgende scherm de SIP-Username en het SIP-password in van uw Simmpl VoIP-account. U kunt deze vinden op de Simmpl telefooncentrale en kunt uiteraard contact met ons opnemen voor assistentie.

Bij Registrar en Proxy server vult u in: pbx.callvoip.nl

| Select your Internet telephony provider and enter the registration data sent to you. | | |
|---|---|---|
| Telephony provider • | | |
| Telephone Number for Registration* | Internal Telephone Number in the FRITZ!Box* | Telephone number for registration/ |

Stap 2: uw telefoontoestel(len) aansluiten / aanmelden op uw FRITZ!Box

In de vorige stap heeft u uw Simmpl VoIP-account succesvol geregistreerd. Uw FRITZ!Box is een telefooncentrale waarop u meerdere (max. 10) VoIP-accounts kunt registreren en waarop u diverse toestellen kunt aansluiten.

| Type FRITZ!Box | analoog (FXS-poorten) | ISDN (S0-bus) | DECT (ingebouwd basisstation) |
|----------------|--------------------------|------------------|----------------------------------|
| FRITZ!Box 7140 | 2x (FON1/2) | | |
| FRITZ!Box 7170 | 3x (FON1/2/3) | 1x | |
| FRITZ!Box 7270 | 2x (FON1/2) | 1x | 1x (max 6 DECT-toestellen) |
| FRITZ!Box 7272 | 2x (FON1/2) | 1x | 1x (max 6 DECT-toestellen) |
| FRITZ!Box 7330 | 1x (FON1) | | 1x (max 6 DECT-toestellen) |
| FRITZ!Box 7340 | 2x (FON1/2) | | 1x (max 6 DECT-toestellen) |
| FRITZ!Box 7360 | 1x (FON1/2) | | 1x (max 6 DECT-toestellen) |
| FRITZ!Box 7390 | 2x (FON1/2) | 1x | 1x (max 6 DECT-toestellen) |
| FRITZ!Box 7490 | 2x (FON1/2) | 1x | 1x (max 6 DECT-toestellen) |

Op de diverse soorten FRITZ!Boxen kunt u verschillende soorten apparaten aansluiten:

Uw analoge toestellen kunt aansluiten op de analoge FON-poorten (2 of 3). Uw ISDN-apparatuur (ISDN-centrale of ISDN-toestel) kunt u aansluiten op de S0-bus. Uw DECT toestellen kunt op op de FRITZ!Box-DECT basis aanmelden via de aanmeldprocedure die u start via de configuratie-pagina.

Om toestellen aan te melden gaat u naar menu [Telephony Devices]. Klik vervolgens op [Configure New Device]:

| Enter71 | FRITZ!Box 7490 | | | | | FRITZINAS | MyFRIT2 | 21 |
|-------------------|--------------------------------|---------------------------------------|---|-----------|----------|-----------------|-------------|--------|
| | Telephony > Telephony Dev | | | | | | | ? |
| Overview | On this page you can configure | and edit the telephones, answering ma | chines and fax machines connected to the FF | RITZIBox. | | | | |
| Internet | Name 🐡 | Connect via | Telephone number Outgoing | Incoming | Internal | | | |

| | Back | Next | Cancel |

De FRITZ!Box toont welke aansluitmogelijkheden nog beschikbaar zijn. In het voorbeeld melden we een DECT toestel aan \rightarrow kies optie DECT. NB: u kunt DECT-toestellen ook toevoegen via menu-optie [**DECT**]

| Connect a telephone | |
|--|------------------|
| | |
| 1. Connect the telephone to a suitable FON socket on the FRITZIBox or keep your cordless (DECT) or IP phone ready. | |
| 2. Select the port at which you want to operate the telephone. | |
| FON 1 (analog telephone) - busy | |
| FON 2 (analog telephone) - busy | |
| FON S0 (ISDN telephone) | |
| DECT (cordless telephone) | |
| LAN/WLAN (IP telephone) | |
| | |
| | |
| | Back Next Cancel |
| | |

Volg de verdere instructies om de handset aan te melden:

| Registering A Cordless (DECT) Telephone | | | |
|---|------|------|--------|
| Proceed as follows: | | | |
| 1. Pick up your cordless handset and open the operation menu to start registration with a base station. | | | |
| 2. If the operation menu requires selection of a base station, select the base station. (Generally this is the base station 1.) | | | |
| 3. If the operation menu requires a PIN entry, enter the PIN (0000 upon delivery). | | | |
| | | | |
| | | | |
| | | | |
| | Back | Next | Cancel |

Wacht tot de handset is geregistreerd en laat de FRITZ!Box testen of de handset rinkelt:

| Cordless (DECT) Telephone Performing Registration | |
|--|-----------------------|
| Registering your cordless telephone with the FRITZ!Box | |
| | Please wait a moment. |
| | |
| | |
| | |
| | |
| | Back Next |
| | |

Na de succesvolle registratie is uw handset toegevoegd aan de toestellenlijst:

| Telephony > Telephony Devic | :es | | | | | | ? |

Uw voicemail bellen?

De Simmpl centrale biedt twee soorten voicemail:

- bedrijfsvoicemailbox→ bel 1233 gevolgd door het voicemailboxnummer- persoonlijke voicemail→ bel 1233 of uw eigen verkorte nummer (001, 002, etc.)

Problemen met de gesprekskwaliteit van toestellen achter uw FRITZ !?

Als u (soms) meer bandbreedte gebruikt dan u tot uw beschikking heeft, of als de hoeveelheid bandbreedte die u krijgt in de praktijk schommelt zodat u deze grens tegenkomt, dan kan het zijn dat u een slechtere gesprekskwaliteit ervaart. Storingen, echo, ruis, delen die uit het gesprek wegvallen: dit zijn voorbeelden van zaken die kunnen optreden bij te weinig bandbreedte.

In zo'n situatie kunt u een extra prioritering inschakelen voor uw IP-toestellen die achter de FRITZBox staan.

- 1. Log in op uw FRITZ!Box
- 2. Ga naar menu [Internet] \rightarrow [Filters]
- 3. Kies tabblad [Prioritization]
- Bij Prioritized Applications, voeg een prioriteitsregel toe voor [All devices] → [Internet Telephony]
- 5. Sla op en verifieer of de problemen nu minder danwel verdwenen zijn

Gefeliciteerd!

U heeft uw toestel nu gekoppeld met het nummer en kunt starten met bellen en gebeld worden.

Productafbeelding FRITZ!Box 7490

Link naar website fabrikant:

http://en.avm.de/products/ http://www.fritzshop.nl

FRITZ!Box resetten naar factory defaults:

- Kunt u nog inloggen? Reset uw FRITZ!Box dan via menu [System] → [Backup] → tabblad [Factory Settings].
- . Kunt u niet meer inloggen? sluit een telefoontoestel op de FRITZ!Box aan.
- Bel met het toestel de volgende code: #991*15901590*
- U hoort een pieptoon; wacht tot u alles LED's aan en uit ziet gaan.
- Hang pas nu op. Uw fritzbox is nu gereset naar factory defaults

FRITZShop.nl

CallvoipTelefonie werkt al jaren met FRITZ!Boxen en kan u het gebruik hiervan van harte aanbevelen. Bezoek <u>www.fritzshop.nl</u> voor een ruim assortiment en veel tips.
